

St Mary's College Toowoomba

Providing quality Catholic education for boys since 1899

iPad Tips & Tricks – Move & Delete Apps

You can move the icons around on your iPad and delete apps you no longer use. Hold your finger on any icon for a few seconds and they will all start to shake. You can now drag them around to rearrange.

You can also move them to order pages by dragging the icon to the edge of the current screen to go to the next page. The little cross on the corner of downloaded apps allows you to delete them.
