

St Mary's College Toowoomba

Providing quality Catholic education for boys since 1899

iPad Tips & Tricks – Multitasking Gestures

Rather than pressing the **Home** button, simply use your fingers to quickly navigate between apps.

Swipe left or right with four fingers to switch between your open apps. Slide up with four fingers from the bottom of the screen to reveal the **Multitasking Bar**, or pinch four fingers together to return to the home screen.

If you find that you use these gestures accidentally you can turn them off. Open **Settings**, tap **General**, and turn off **Multitasking Gestures**.
