

St Mary's College Toowoomba

Providing quality Catholic education for boys since 1899

iPad Tips & Tricks – Restarting Properly

A hard reboot can help to get your iPad going again. If an application refuses to start or your iPad has frozen, just press and hold the **Home** button and **Sleep/Wake** button together for ten seconds. Ignore the slide to power off message and the iPad shuts down. Now just turn the iPad on normally and it should be working perfectly again.
