

iPad Tips & Tricks – Save Space

If you find that your iPad is running out of storage, you might want to know what's taking up all the space.

Open **Settings**, tap **General**, and then **Usage**. This shows you all your apps and their size in descending order.

To delete an app, first tap the app listing to see a summary, then tap the **Delete App** button. If you decide that you want the app again, you can re-download it from the **App Store**. Tap the **Purchased** tab and find the app you want to install again.
