

iPad Tips & Tricks – Set Wallpaper

You can set your Wallpaper from **Settings**, then **Brightness & Wallpaper**. From here you can see your current wallpaper. Tap this and choose from the included wallpaper or your photos.

Once you've chosen your picture, you need to decide if you want it to be your **Lock Screen**, **Home Screen**, or **Set Both**. The Lock Screen is when you unlock your iPad and the Home Screen is where all your apps are.

You can also set these from the Photo app without exiting to **Settings**. When looking through your photos, tap the  icon and select **Use as Wallpaper**.
